

Summary

MERN Stack Developer with hands-on experience building scalable, responsive SaaS web applications using modern JavaScript technologies. Proficient in React.js, Tailwind CSS, Node.js, Express.js, and MongoDB, with experience developing end-to-end features across frontend and backend. Strong focus on performance, usability, security, and clean, maintainable code.

Skills

Experience

MoovOn Service & Solutions

MERN Stack Developer

- Developing full-stack SaaS applications using MongoDB, Express.js, React.js, and Node.js.
- Building responsive user interfaces with React.js and Tailwind CSS focused on usability and performance.
- Integrating RESTful APIs and managing client-server communication and application state.
- Implementing pagination and optimizing data rendering for large datasets.
- Developing frontend Role-Based Access Control (RBAC) for permission-based navigation and protected routes.
- Creating reusable, scalable React components following modern best practices.
- Contributing to backend development including API creation and database integration under senior guidance.
- Collaborating with cross-functional teams to deliver new SaaS features and enhancements.
- Maintaining modular code and improving application performance and scalability.

Ervon Technology

Frontend Developer Intern

- Designed and developed responsive web pages using HTML, CSS, and JavaScript.
- Built interactive UI components for client-facing applications.
- Used React.js and Bootstrap to develop dynamic user interfaces.
- Ensured cross-browser compatibility and optimized user experience.

Projects

- Taskji.com - SaaS Task Management Platform: Contributed to frontend development of a SaaS task management system. Implemented UI components using React.js and Tailwind CSS. Integrated backend APIs and improved user workflows. Applied modular component architecture to support scalability.
- Blog Platform - Scalable Content Management System: Led backend development using Node.js, Express.js, and MongoDB. Implemented JWT-based authentication with Access and Refresh Tokens. Developed file upload system using Multer with Cloudinary cloud storage integration. Designed scalable data models and MongoDB aggregation pipelines. Applied MongoDB middleware (hooks) for validation and business logic enforcement. Configured CORS for secure API communication. Built RESTful APIs for content publishing, user management, and role-based operations. Guided intern developers during backend implementation.
